

MONTGOMERY COUNTY YOUTH CENTER
BMI Report for School Year 2021-2022
July 2021 – June 30, 2022

Upon admission to the facility each resident has a medical intake performed. As part of the intake process, height and weight is obtained for each resident on each admission. This data is used to calculate BMI for each resident. Every resident is scheduled to have their height and weight measured every thirty (30) days during their stay at the facility. The category determination for BMI is made utilizing the following chart:

BMI Category	BMI Range
Healthy	18.5-24.9
Overweight	25-29.9
Obese	30-39.0
Extreme Obese	40 and above

Residents are in the Secure Detention Program or Shelter Program. This graph included in the report is the intake BMI for all detention and shelter residents who entered our facility during the School Year 2021-2022. The sample size for total intakes is 190 residents. Of those, the break down for BMI Category upon admission is as follows:

BMI Category	Percentage of Residents
Healthy	44 %
Overweight	28%
Obese	12%
Extreme Obese	4%
